CITYGLOBE 2015.

Cities in Action Reflecting Global Challenges
International urban planning Conference in Budapest
Organised by MUT- Hungarian Urban Planning Association
in cooperation with ECTP

About CITYGLOBE 2015

Main topic:

Urban responses in addressing global economic and social challenges – Cities' strategic responses to certain global challenges, the issue of smart city.

The general concept of the conference is to illustrate how cities – mostly by their urban planning activities in broader sense – can react and tackle challenges, which has global nature, such as

- **climate change,**
- **energy challenge,**
- **increasing economic pressure** to growth,
- **cut public spending,**
- **increasing competition** among cities e.g. in innovation,
- and the most possible efficiency in operation (see **smart city**).

Obviously only few of this challenges can be addressed in one event.

Date:

24-26 April 2015

Location: Student and Business Development Center, 1084 Budapest, Horánszky utca 13.
